RE: Site Control across USS9665 for Possible Kanektok River Reroute

Dear _____,

The erosion of the Kanektok River along the old runway in Quinhagak has gotten worse each year. One of the options being considered to reduce future erosion in this area, is to reroute the river back in to an old channel.

Based on historical images of the area, it appears that the river found its current alignment after capturing borrow pits that had been excavated between the old runway and the river in the 1990s. The *Kanektok River Erosion Study*, completed in February 2019, identified three alternatives to rerouting the river back into the old channel. We are reaching out to native allotment owners that would be impacted by Alternative #1 and Alternative #2.

As you can see, one of these alternatives would require cutting a channel through your native allotment US9665 Lot __. Prior to moving forward with additional analysis on these alternatives, we wanted to check with you and see if you would be willing to grant site control for this river reroute project. The details regarding land purchase or land trade are still being worked through. However, we are interested in getting your thoughts on the following:

- 1) Would you be willing to grant site control for a Kanektok River Reroute Project?
- 2) If so, would you be interested in a land trade or a land purchase?

We are still very much in the conceptual planning stage and only gathering information at this time, however your information will help us as we work with the community to reduce erosion impacts.

Attached is a questionnaire designed to document your willingness to grant site control across your native allotment for the possible reroute of the Kanektok River. Your participation is incredibly important. Please review and complete the attached Statement of Non-Objection/Objection and return one of the following ways:

- 1) In Person to Joseph Pleasant (phone 556-2095)
- 2) Fax to CRW Engineering Group (907) 561-2273
- 3) Deliver/Mail to CRW Engineering Group 3940 Arctic Blvd. Suite 300, Anchorage AK 99503

Please don't hesitate to call (907) 562-3252 or e-mail (ameeks@crweng.com) with any questions.

Sincerely,

Joseph Pleasant
Site Control Coordinator
